PROFESSIONAL SUMMARY

DevOps-focused B.Tech Computer Science student with hands-on experience building and deploying AI-powered full-stack applications, streamlined CI/CD pipelines, and cybersecurity tooling. Comfortable taking projects from development through cloud deployment using React.js, Node.js, Docker, Jenkins, and AI APIs. Open to DevOps, Software Engineering, and Full-Stack Development roles.

EDUCATION

B.Tech in Computer Science and Technology (DevOps Specialization)	Expected May 2027
Presidency University, Bangalore, Karnataka	
• CGPA: 8.50/10.0 — Relevant Coursework: Cloud Computing, DevSecOps, Data Structures, Competitive Programming	
Pre-University Certificate (12th Grade)	87%
Reva PU College, Karnataka	
Matriculation (10th Grade)	84%
St. Michael's High School, Karnataka	

EXPERIENCE

Web Development Intern	June 2025 – July 2025
Zidio Development, Remote	
• Built responsive web application components, streamlining frontend integration workflows across the codebase.	
• Collaborated with the development team using Git and GitHub for version control, managing feature branches and merges in a team-based workflow.	
• Strengthened debugging, REST API integration, and deployment skills through hands-on feature delivery.	
Java Programming Intern	August 2024 – September 2024
Interpe, Remote	
• Created Java-based applications, including Tic-Tac-Toe and Connect 4, applying Object-Oriented Programming concepts.	
• Strengthened core problem-solving and software development fundamentals through applied coding exercises and peer code reviews.	

PROJECTS

AI DevOps Log Analyzer (React.js, Node.js, Express.js, Gemini AI, Docker, Render, Vercel)	Live Demo GitHub
• Built and deployed an AI-powered DevOps monitoring platform analyzing Jenkins, Docker, and Kubernetes logs for issue detection.	
• Integrated the Gemini AI API for anomaly analysis and streamlined security risk assessment.	
• Deployed full-stack app across Render (backend) and Vercel (frontend) with a production-ready CI workflow.	
AI Cyber Threat Detection Dashboard (React.js, Node.js, Express.js, Gemini AI API, Tailwind CSS)	Live Demo GitHub
• Designed an AI-powered cybersecurity dashboard detecting phishing URLs, malicious activity, and threat indicators.	
• Implemented AI-driven threat scoring, severity analysis, and AI-generated mitigation recommendations via the Gemini AI API.	
Smart Bike Safety Light System (YOLOv5, Raspberry Pi, Python, OpenCV)	
• Built a real-time vehicle detection system using YOLOv5 on Raspberry Pi with live IP camera integration.	
• Applied glare reduction, CLAHE enhancement, multithreading, and frame skipping to optimize inference performance on constrained hardware.	
• Designed real-time red/green safety indicators for low-resource traffic monitoring environments.	
DevOps CI/CD Pipeline Project (Jenkins, Docker, GitHub, Jenkinsfile)	
• Developed an automated CI/CD pipeline using Jenkins and Docker, integrated with GitHub for source control.	
• Streamlined build, test, and deployment stages via pipeline-as-code (Jenkinsfile), reducing manual release steps.	

- Excel Analytics Platform** (React.js, Node.js, Express.js, REST APIs)

[Live Demo](#) | [GitHub](#)
- Engineered a full-stack analytics platform for Excel dataset uploads and interactive data visualization.
 - Created REST APIs for real-time chart generation and analytics processing.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, HTML, CSS
Web & Frameworks: React.js, Node.js, Express.js, Tailwind CSS, REST APIs
Databases: MongoDB, SQL
Data & Analytics: Data Visualization, Chart Generation, Analytics Processing
DevOps & Cloud: Docker, Jenkins, Git, GitHub, CI/CD Pipelines, Oracle Cloud Infrastructure, Render, Vercel
AI/ML & Security: Gemini AI API, YOLOv5, AI Log Analysis, Threat Detection
Other Tools: VS Code, Linux

CERTIFICATIONS

- Oracle Cloud Infrastructure Foundations Associate
- YUVA AI Certification
- HackerRank Python (Basic) Certificate
- IELTS Academic — Band Score 6.5/9.0 (January 2026)

ACHIEVEMENTS

- Built and independently deployed 5+ full-stack projects spanning AI, DevOps, analytics, and cybersecurity.
- Active learner of scalable system design, automation workflows, and intelligent monitoring systems.
